[By Telegraph to the Pittsburgh Gazette.]

NEW ORLEANS, August 27.—A resolution was yesterday offered in the House, similar to those offered in the Senate on Tuesday, calling for a Committee of Inquiry into the charge affecting the official integrity of the Governor and certain members of the Legislature. The House refused to receive the resolution, a suspension of the rules being necessary. To-day under a suspension of the rules for the purpose, Mr. Miller, the leading Radical of the House, introduced a preamble and resolution, in substance as follows:

WHEREAS, The representative of the Tenth district parish of New Orleans, W. Pope Noble, on the 26th inst., asked leave to introduce a resolution inquiring into certain assumed rumors touching the official integrity of the Governor; *And whereas*, the *Times* newspaper, to which the said member is or has been attached, this morning gives publicity to a resolution sought to be introduced founded on the charges therein contained, therefore,

*Resolved*, That a Committee of Three be appointed to investigate the action of the member from the Tenth district, and if in the opinion of said Committee he was prompted by malice and a desire to promote the interests of his political party by this unwaarantabla proceeding, then said Committee be and is hereby instructed to present a resolution expelling said member from this body.

The ayes and nays were called for and the resolution was lost—ayes 26, noes 38, the Democrats without exception voting for the Committee of Inquiry.

## ATLANTA, GA.

**Proceedings of the Georgia Legislature.**

[By Telegraph to the Pittsburgh Gazette.]

ATLANTA, August 27.—In the Senate today a bill postponing the election in Savannah until the second Tuesday in December was passed—thirty-three to seven. It also increases the number of ballot-boxes to three.

Mr. Campbell, a negro, opposed the postponement. He said if the ballot boxes were in one building the negroes would have no chance to vote, and if not allowed to vote would fight. He warned Senators to be careful how they act in the matter.

A long and warm discussion took place on the eligibility of negro members and the right of negroes to hold office.

Mr. Tomblin, Democrat, said the question was one of vital importance to both races in Georgia. They are here consuming the people's money, and the action of the Legislature was clogged until the question was settled.

A motion to consider the minority report was adopted—ayes 80; noes 53.

## CITY AND SUBURBAN.

**Grand Rally of the Grant Clubs on the South Side of the Monongahela.**

About half past seven o'clock last night, the citizens living in Birmingham, East Birmingham, South Pittsburgh, etc., began to gather at the place of meeting—at the south end of the Monongohela Suspension Bridge, whither the inspiring notes of two brass bands called them. These two—the Iron City and Franklin—discoursed patriotic airs alternately. The yard where the meeting was held was large and well-filled, mainly with people from the south side. At eight o'clock the meeting was called to order by the nomination of Mr. Howard B. Negley for President, and the reporters present to act as Secretaries.

Mr. Negley introduced Senator James L. Graham, who was received with uproarious cheers.

Mr. Graham apologized for having no prepared speech, but he was suffering so severely with neuralgia in his head that he had feared he should not have been able to speak at all. He then began to speak to them as crowds as large as that of last night like to be spoken to, running from subject to subject and interspersing anecdotes, telling hits and occasional bursts of eloquence that kept the crowd in alternate cheers and laughter for nearly an hour. He began by saying that the issues before us are so plainly defined that he who runs may read. We have two platforms before us, that of Chicago the exponents of which are Grant and Colfax, and that of New York on which stand Seymour and Blair. Between these we are asked to choose—between Gen. Grant (here the speaker drew a slight sketch of the General's life) and Horatio Seymour. Of Grant, William Wallace, a Democratic member of the State Senate, had said, "He is no statesman and, therefore, not fit to be President, for only from among statesmen and lawyers should that officer be chosen." Would American workingmen, every one of whom had been told from his infancy that if the people willed it he might one day be President, believe this? Horatio Seymour is a wily, unprincipled, scheming politician, not half so fit to be Chief Magistrate of the nation as any *honest* workingman present. Who are his friends, who his supporters? [A voice cried "the grey-backs!"] Yes, the grey-backs; men who fought under the rebel rag when General Grant was leading many of those present to victory under the glorious star spangled banner. Would honest working men vote for this silent, hard-fisted, close mouthed, loyal man of few words and great deeds; this tanner, who had tanned hides before the war, and would now tan Seymour hides; or for this wily, disloyal scheming, rebel's friend Seymour, who addressed the bloody handed murderers of women and orphans at the New York riots, in '63, as "My Friends," and said the war cause was lost on the very same glorious Fourth of July when Grant at Vicksburg and Meade at Gettysburg were leading their men to victory? (Cheers for Grant.) Again, he warned all voters that many men would talk of greenbacks, of finances, of all sorts of things, but the true question is between loyalty and disloyalty, between patriotism and treason. Is it possible for any one to hesitate for which to decide? Mr. Graham then touched lightly on the finances and reconstruction question, and wound up by saying that negroes have rights as well as white men, they have a right to their own persons and liberty, to be the fathers of their children and the husbands of their wives under the law. The question is one of equality of rights and not of social equality, as the Democrats say. There are many white men who he would not want to sleep with or marry his daughter to, or to eat at his table, and it is the same with all of us, and yet those white men are legally our equals; and in conclusion he would promise that if all present would promise to vote for Grant and Colfax, if next winter, when he is at Harrisburg, they will get up a petiton to that effect he will try to pass it, making it a law that any negro woman consenting to receive the attentions of, and be courted by a Seymour Democrat, shall be condemned to read the La Crosse *Democrat* for a year and then, although he did not want to appear profane, "May God have mercy on her soul."

With great and prolonged cheers the honorable Senator took his seat. During his speech the Second Ward Glee Club, headed by Prof. J. H. Jones, and the Second Ward Grant Club, marched in and took their places in the audience. At the conclusion of the speech the glee club sang the "U. S. Race," with telling effect.

The Chairman then introduced Mr. J. W. F. White, who spoke at some length and with great ability on the reconstruction question. He began with a retrospection of the last eight years, and when he came to the close of the war he asked, "and why did the rebels fail?" It was because of the clear-heads, loyal hearts and strong arms of the working men of the North, the common-school-educated men of the North. The battle is the same in 1868 as it was in 1864, and what is it? It is idle to talk of greenbacks, tariffs, etc. The one question is just this, shall those men who for five years carried on a war, unequaled in the history of the world, now that they have been whipped back, come into the Union and, aristocrats as they profess to be, dictate the policy of the Government to the mudsills of the North, as they call the working men? Frank Blair advocates war, and says that the reconstruction acts are revolutionary, unconstitutional, and he is, far more than Seymour, the idol of the Democracy. Wade Hampton introduced those three words into the Democratic platform, and said that the South had with those three words all that it wanted. If this platform prevails, and the reconstruction laws are void and pronounced unconstitutional, then the lost cause is indeed regained and the rebels will have won all that they fought for, and the five hundred thousand dead soldiers of the Union have fallen in vain. The emancipation proclamation is void too, and the North will be made to pay for millions of slaves. We will be forced to assume the rebel debt and what then will taxation amount to? This was the opening, and Mr. White went on for about an hour, stating plain facts and reasoning clearly and logically about the great question of reconstruction to an audience whose earnest faces showed that the men followed and appreciated the speaker's arguments.

At about half-past ten the meeting broke up. Early in the evening, just as Mr. Graham was about to begin his speech, a small Democratic torchlight procession passed along the street, and some of the party amused themselves by throwing stones at the speakers' stand. Fortunately, no one was hurt, but one, as large as a man's fist, came within a few inches of the head of one of the reporters present, and lodged on the table between the reporters of the various papers. If this missile, which was evidently thrown by a practiced hand, had been a few inches to one side or the other, one of the morning papers would have been minus its report of the meeting, and there might even have been a murder, for the stone was heavy and came with great force. This is by no means the first time that things of this sort have happened, and if they continue, peaceable citizens, much as they may regret it, will have to take the means of redress into their own hands.

MORTGAGES.

Same day sixteen mortgages were filed.

**What Has Become of Them?**

We clip the following from a city daily of yesterday:

"MAYOR'S OFFICE BUSINESS.—Since Mayor Blackmore entered into office, on the first of February, he has received over one thousand informations which have been or will be returned to Court. This is a large business. The disposition of all cases may be seen on his books. If some of our Aldermen would take the trouble to preserve a similar record in a certain class of informations brought before them, the public would, we have no doubt, peruse it with interest. There is no prospect that this will come to pass, however, while taverns sell liquor on Sunday, and gambling "hells" exist within the jurisdiction of ward magistrates."

An examination of the official record, the Information Docket, in the Clerk's office, shows that Mayor Blackmore, up to this date, has returned to Court but *one hundred and twenty-nine* informations since he came into office on the first of February last. This leaves eight hundred and seventy-one to be accounted for. We learn from good authority that not over five per cent. of the informations received ever come to Court.

**Panegyric on Thad. Stevens.**

The Lancaster *Express* says the tribute of Dr. Burrowes to the memory of a valued friend, was such as could be paid only after a long and intimate acquaintance. The life of Mr. Stevens was traced from childhood to manhood, then through his public career as a lawyer at the bar, a prominent politician, a member of the State Legislature and of the National Congress, and many facts were elicited which are not generally known. The leading features of his character were brought out by apt illustration and anecdote. We hope to see this paper published, as it will do much, we believe, towards giving the public a truer idea than is generally entertained, not only of the statesman, but also of the man Thaddeus Stevens.

**Committee of Arrangements.**

The following gentlemen have been appointed as a Committee of Arrangements for the grand mass convention, to be held in this city on the 24th proximo.

Captain Hugh S. Fleming, Chairman; Col. Felix C. Negley, Major Gus Schleiter, John Heath, Martin Schaffer, C. D. Brigham, Daniel O'Neil, John A. Myler, Capt. M. W. Beltzhoover, George W. Hailman, J. G. Seibeneck, Wm. M. Hersh, Frank B. Penniman, Wm. H. Barker, B. Oppenheimer, Benj. Coursin, Captain William B. Cook.

JOHN H. STEWART,
Secretary.

## WASHINGTON TOPICS AND GOSSIP.

General Rosecrans has succeeded in his mission to the leading Southern Generals. He has induced them to issue an address to the people setting forth their feelings upon public matters, giving their ideas of the true condition of the South, and advising the people lately in rebellion upon the proper course to persue in the future. General Rosecrans will bring this address with him to Washington, when it will be first read to the President and the Cabinet, and he thinks it will be productive of excellent results, both North and South. He found a majority of the Southern Generals satisfied with the present state of affairs, and entirely anxious for a permanent peace in the future, even at a sacrifice of some of their fundamental rights for the time being.

The President has pardoned a number of soldiers imprisoned as deserters during the war, who have served out a portion of their terms.

The instructions to the Southern Commanders give general satisfaction here, and it is believed will prevent any future difficulty in the South. General Meade has arrived here to confer with the Secretary of War relative to affairs in his military department.

Commissioner Rollins has partly agreed to compromise with Secretary McCulloch in regard to the appointment of Supervisors under the new tax law, by naming twelve Democrats and thirteen Republicans for the positions. This will probably result in the immediate appointment of these officers, and then we shall have the new bill in full operation at once.

It has been decided that Congress is to meet next month, and the preparations for that event are going forward rapidly. The pressure from the South was too heavy for the Northern representatives.

It is said Judge Advocate General Holt has decided against allowing a court martial in the case of General Dyer, Chief of Ordnance, in consequence of the fact that several years have elapsed since the crimes charged against Dyer occurred. The latter officer will appeal from General Holt's decision, first to the Secretary of War and then to the President.

Senator Fowler is out in a card denying that he is connected with a ring who have preferred charges against Commissioner Rollins. He says he does not know that any one contemplates preferring such charges. It is still asserted in Presidential circles that Mr. Rollins will be suspended.

—Fred. Douglas said at the Equal Rights Convention, a few years ago the only luxury he enjoyed was a whole seat in a car. Even that luxury he did not have now. —In Wheeling, the other day, some ardent Democrats hung a flag across the street, and to keep it from flapping, hung a strip of muslin, on which the heavy names of Seymour and Blair were printed, to the bottom of it. This would have been very well, as men can stand almost anything now-a-days, if it had not been for the horses who, guided by their unerring instincts, always frightened and shied when they saw the names of such men near their heads; so the inscription had to be sacrificed.

VICTOR HUGO travels on the continent with a British passport, in which he is described as "Victor Hugo, house owner, Island of Guernsey." When he first sent to London for it, the intelligent clerk who had charge of the passport department replied to him that he must exactly state who and what he was. This, however, was not the first time when Victor Hugo found that his illustrious name was by no means as well known as he thought. He was once in Paris, together with Alexander Dumas, at the *mairie* of the sixth *arrondissement*, in order to witness a document. After both he and Dumas had signed it, the clerk asked: "Victor Hugo, what is your business? Are you a public functionary?" "No. Did you never hear of me?" "Never in my life." "Hold on," interposed Dumas, "I am sure you must have heard of me, my friend?" "Dumas!" said the clerk, shrugging his shoulders: "there are a great many persons bearing that name." The two poets left without trying to enlighten the clerk as to who they were.

THE PEABODY FUND is receiving encouraging support in Louisiana. The present agent for that State, who is acting without compensation, has visited Alexandria, Natchitoches, and Shreveport, on Red River, and a large number of places in North Louisiana. He has conferred with prominent citizens in these towns; and in such as have not as yet taken any action, he has appointed Special Committees of Trustees, who have promised their concurrence in his efforts to secure the education of neglected white children, and render the fund operative. In one small town, Arcadia, as much as $1000 was subscribed within a week to lay the basis of a successful school, free to all white children. In Shreveport a young merchant has given an impetus to the movement by promising to contribute $5 a month towards the rearing of two similar schools. In other places, the teachers of private academies and colleges have expressed their willingness to make their elementary departments "free," for a very moderate compensation from the fund.

DETECTION OF ARTIFICIAL FLAVORS OF SPIRITS.—It is well known to many of our readers that a large amount of the substances sold as rum, arrack, etc., are made by the addition of certain essential oils, and other ingredients, to deordorized whisky, or dilute alcohol. If, however, concentrated sulphuric acid be added to a small quantity of the liquor, and allowed to stand until the mixture becomes cold, all the aroma will be found to have disappeared from the fabricated article, either decomposed by the acid or driven off by the heat of combination, while in the genuine spirit the original flavor still remains palpable.

LAMPLIGHTERS, it is stated, are to be superceded in London by a kind of clock-work arrangement attached to the taps of the street lamps, which shall turn them full on at stated times, every night, and shut them off every morning, the gas being kept constantly burning during the day with a very small blue flame, duly protected against extinction by the wind.

**EDUCATIONAL.**

THE WESTERN UNIVERSITY OF PENNSYLVANIA.

Every Parent and Guardian who has a son or ward to educate should know that we have in our city a Chartered Institution, endowed by the State and the generous friends of learning to the amount of $200 000 Preparatory, Commercial, Scientific and Collegiate in character, with a Faculty ten in number, and a course of study equal to that of our best Colleges. The rooms are large and high, and the apparatus and cabinet of a superior kind. The observatory belonging to it has one of the finest telescopes in the country, is endowed, is in charge of an astronomer of great ability, and is having four new instrumets added to it at an expense of $5 000. All the income from endowment and from tuition is expended in supporting the institution. The aim of the Board of Trustees, who are among our most enterprising and benevolent citizens, is to furnish the best advantages to all on youth equal to those enjoyed in any of our cities. The instruction in all the courses of study is thorough, no temporary expedients being resorted to to secure popularity merely. Only Professors of ability and experience are employed.

Catalogues or information may be had by calling at the University Building, corner of ROSS AND DIAMOND STREETS, between 9½ and 11½ A. M. The next term will commence September 1st.

## CENTRAL LIVE-STOCK MARKET.

OFFICE OF THE PITTSBURGH GAZETTE, THURSDAY, August 27, 1868.

CATTLE.

The market has been rather quiet this week, the sales, thus far, being comparatively light, while prices, if anything, are a shade lower. Prime shipping Cattle continue scarce and in demand, and there is also a steady demand for good stock Cattle to ship to the eastern part of the State. The receipts during the past two days only aggregated about one thousand head, and, as we have already intimated, the offerings were mainly of an inferior grade; prices, however, for all kinds of stock continue to tend downward, and the impression among dealers generally is that the bottom has not yet been touched. Prime shipping stock may be quoted at 6¾ to 7c, and extra do at 7¼ to 7½c. Stock Cattle range all the way from 4 to 5½c, as to quality and condition, and bulls at 3 to 3½c.

J. Booth sold 18 head fairish cattle, weighing 17,250, to Landis at 5,60, and 2 bulls, to same buyer, at 3,50; also, 23 head stockers to McCammont at 4,50.

Julius Voter sold 4 head to Moses & Co. at 5,62, and 6 head to Chalfant at 4,25 to 5,50.

Shepard sold 21 head stockers to Hershy, averaging about 800, at 4,50.

Haskett to Watson 17 head of good shipping cattle, weighing 20,000, at 6,25.

Smith & Blue sold 40 head of good shipping cattle, weighing 49,475, to Wright & M. at 6,50; 7 head to Saxton, very common, at 3 to 4,50, and 19 cows to Hedges at 5.

Kerwin sold 34 head bulls to Eaby at 3, and Reed sold Watson 17 prime shipping stock, weighing 19,850, at 6,80.

Christy to Sitze 23 head cows, weighing 19,475, at 5.

Scott to Yohn 22 head cows, weighing 17,600, at 5¼.

McConkle to Lyda 17 head cows at 4,80; same to same, 5 at 5.

Holmes, Lafferty & Co. sold 50 head of stock cattle to Killegan at 4,50; 20 to Landis at 5; 2 to Yohn, and 15 to Klemen at 5,75.

Peter Klemen bought 20 bulls from Shamburg at 3; 19 cows from Reed at $50 per head; 23 bulls from Hedges & Taylor at $35 per head, and 13 from Clark at 4,75.

Monroe sold 20 head of good stockers to Dash at 5¼.

Miller & Young sold 21 of good shipping cattle to Diller & Co. at 6,70.

Hefling to Wright & Co. 17 head of good stock cattle at 5.

Hawk to McCurdy 24 head of fairish stockers at 4,50.

Hedges sold 24 head of common stock to Evans at 4. Carlon to same buyer, 16 head at 4,75.

Hazlewood & Blackstock to Miller 37 head of stockers, weighing 29,600, at 4,50.

SHEEP.

There is an abundant supply of common and "scalawag" Sheep, while prime fat Sheep, are in limited supply; the former do not seem to be wanted, scarcely at any price, while the latter are in good demand, and sell readily at full prices. The arrivals, however, were not as large as those of last week, and we doubt whether some of these "scalawags," will bring much more than will pay for cost of transportation and feed bills, if that. It is the wrong season of the year to offer stock sheep, particularly, as the pasture fields begun to look bare, and farmers, generally, instead of wanting to buy, would prefer to sell.

W. Gallagher bought 210 from Holmes Lafferty & Co., at 3,65; 101 from McBane at 4,27; 100 from Adams at 3,10.

C. Pearce bought 100 from Cook, 212 from Campbell, 106 from Randal, 106 from Gardner—no price given; 176 from Hedges & Taylor at 3,90; 34 from Holmes, Lafferty & Co., at 2¾; 186 from Quick—no price.

Orr & Williams sold 558 head to Wright & Co., at $2,25 per head.

Kinsey sold 206 to West at 3¾.

HOGS.

The Hog market, especially for prime heavy averages, continues firm, and with a good demand, and continued light receipts, prices are well sustained. Prime extra may be quoted at $10,50 to $10,80, with sales of some four car loads choice Chicago Hogs at $11. New York Hogs may be quoted at $9 to $9,50.

Wesley Hedges bought (for New York) from Hedges & Taylor at 10; 50 from Johnston at 9,50; 65 from Holmes, Lafferty & Co. at 9,50; 50 from Tipton at 8,85; 21 from Weston at 9,50; 39 from Crawford at 9,50; 45 from McCurdy at 9,50; 32 from Vogler at 9,80; 19 from Monroe at 8,75; 27 from Galston & Hanlin at 9,50; 107 from Casky at 9; 52 from Holmes, Lafferty & Co. at 9,40; 43 from Magruder at 8,50; 33 from Orr & Williams at 9,25; 19 from W. ## RIVER NEWS.

—The agent of the associated press at St. Louis must be hard up for news, as will be seen by the following telegram: The New Albany Insurance Company has brought suit against Captain Donaldson and others, owners of the Great Republic, on a promissary note for $500.

—The J. P. Webb has entered the trade between Cincinnati and Evansville, with the calculation to become a fixture.

—The Camelia has laid up at Marietta, to await a rise.

—We clip the following from the Cincinnati *Gazette*, of Wednesday: The Tahlequah, which left here for Wheeling last week, could get no further up than Marietta, and returned yesterday, bringing back her Wheeling freight, having taken it at so low a rate as to be unable to reship it.

—Capt. Salem Enyart, and Michael Kavanaugh, a well known pilot, died at Cincinnati on Wednesday last.

—The Cincinnati *Commercial*, of Wednesdays: It is rumored in knowing marine circles that the Cincinnati and Louisville U. S. Line will adopt the restaurant plan on their steamers on the 1st of January. This is an excellent arrangement, one that will prove profitable to all interested in steamboat stock. It is a noted fact that more than one-half of the food prepared on steamers is either thrown overboard or cast in the slush barrel, at the expense of the boat while, by introducing the restaurant plan, the passenger only orders what he may want, and pays for it the same as in a first-class restaurant. The day is not far distant when this plan will be adopted on all our passenger steamers. The passenger will pay his fare for travel and state-room, and settle with the steward for all he may eat or drink.

—The Richmond made the trip hence to Shreveport in five days, and thence to Jefferson, whither she went on twenty inches water, under 1,000 barrels freight, in one day, which is the great achievement of the Red River low water season this year.—*Commercial Bulletin 26th.*

—Richard Lucas, a negro engaged on the steamer Selma as cook, fell overboard, on Saturday afternoon, and before assistance could be rendered was drowned. The unfortunate man was a resident of Pittsburgh, where it is thought he has a family.

—The officers of the steamer Marcella report a steamer, whether the Mountaineer or Antelope, undecided, at Bissell's Point, in the Missouri, head down stream, and supposed to be snagged through the lower and upper guards. The Marcella was not hailed.

—The following boats are laid up at New Orleans: Frank Pargoud Vicksburg, Wild Wagoner, St. Nicholas, National, Cotile, Frolic, Satan, Enterprise, Nina Semmes, B. L. Hodge, Lizzie Hopkins, Lafourche, Glide No. 3, Caroline, Gossamer, Iberville, Annie Wagler and T. D. Hine.

—Some papers exhibit astonishing incredulity in regard to the building of Captain De Haven's great boat. Although it has been announced that the contracts have been awarded, the names of the contractors for the building of the boat having even been published, yet they still evince some doubt that it is a fixed fact.

—Capt. Thos. B. Rhodes, on the part of the Northern Line Packet Company, has contracted, at Wheeling, for the hull of a new packet. The machinery, cabin, etc., will be put on at Pittsburgh. The same company will, in a short time, contract for two more boats, one of which is intended to be finer and faster than any steamer that ever went to St. Paul.

UNION PACIFIC RAILROAD.

700 MILES

OF THE

UNION PACIFIC RAILROAD

Are now finished and in operation. 160 miles of track have been laid this spring, and the work along the whole line between the Atlantic and Pacific States is being pushed forward more rapidly than ever before. More than twenty thousand men are employed, and it is not impossible that the entire track, from Omaha to Sacramento, will be finished in 1869 instead of 1870. The means provided are ample, and all that energy, men and money can do to secure the completion of this

GREAT NATIONAL WORK,

At the earliest possible day, will be done.

The UNION PACIFIC RAILROAD COMPANY receive:

I.—A GOVERNMENT GRANT of the right of way, and all necessary timber and other materials found along the line of its operations.

II.—A GOVERNMENT GRANT of 12,800 acres of land to the mile, taken in alternate sections on each side of its road. This is an absolute donation, and will be a source of large revenue in the future.

III.—A GOVERNMENT GRANT of United States Thirty-year Bonds, amounting to from $16,000 to $48,000 per mile, according to the difficulties to be surmounted on the various sections to be built. The Government takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in services rendered by the Company in transporting troops, mails, &c. The interest is now much more than paid in this way, besides securing a great saving in time and money to the Government.

IV.—A GOVERNMENT GRANT of the right to issue its own FIRST MORTGAGE BONDS, to aid in building the road, to the same amount as the U. S. Bonds, issued for the same purpose, and *no more*. The Government permits the Trustees for the First Mortgage Bondholders to deliver the Bonds to the Company only as the road is completed, and after it has been examined by United States Commissioners and pronounced to be in all respects a first-class Railroad, laid with a heavy T rail, and completely supplied with depots, stations, turnouts, carshops, locomotives, cars, &c.

V.—A CAPITAL STOCK SUBSCRIPTION from the stockholders, of which OVER EIGHT MILLION DOLLARS have been paid in upon the work already done, and which will be increased as the wants of the Company require.

VI.—NET CASH EARNINGS on its Way Business, that already amount to MORE THAN THE INTEREST on the First Mortgage Bonds. These earnings are no indication of the vast through traffic that must follow the opening of the line to the Pacific, but they certainly prove that

FIRST MORTGAGE BONDS

upon such a property, costing nearly three times their amount, ARE SECURE BEYOND ANY CONTINGENCY.

The Union Pacific Bonds run thirty years, are for $1,000 each, and have coupons attached. They bear annual interest, payable on the first days of January and July, at the Company's Office, in the City of New York, at the rate of six per cent. in gold. The Principal is payable in gold at maturity. The price is 102, and at the present rate of gold, they pay a liberal income on their cost.

The Company believe that these Bonds, at the present rate, are the cheapest in the market, and reserve the right to advance the price at any time.

Subscriptions will be received in Pittsburgh by

JAMES T. BRADY & Co., corner of Wood and Fourth Streets;

HART, CAUGHEY & Co., corner of Wood and Third Streets;

S. McCLEAN & CO., 75 Fourth Street;

PH. R. MERTZ, corner 5th and Wood Sts.;

ROBINSON BROS., 78 Fourth street;

AND IN NEW YORK

At the Company's Office, No. 20 Nassau Street, and by

JOHN J. CISCO & SON, Bankers, No. 59 Wall Street, and by the Company's advertised agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices, or to any of the advertised agents.

GOLD closed in New York yesterday at 145⅛.

IT is officially announced to be the duty of Sheriffs to insert in their election proclamations the law of this Commonwealth relative to deserters. This law is in full force only as to such deserters as have been tried by courts martial.

IT seems to be settled that Congress will meet in September. We trust they will make short work with the reviving spirit of rebellion. Of course we shall hear the "old rebel yell," but Union men are no longer frightened by that.

WE are gratified to learn from Washington that the President and Secretary of the Treasury have at last consented that the Revenue Law, as passed by Congress a month ago, may go into operation. Let the people be thankful for all favors from His Excellency!

THE telegraph reports that the Republicans of Philadelphia opened the campaign with a mass meeting on Wednesday night. This statement is so plainly at variance with previous information that we prefer to await fuller advice by mail.

A LEADING Democratic journal—BRICK POMEROY'S new paper at New York—comes out squarely for the repudiation of the public debt. That is the draft of copperhead sentiment everywhere, although, with the same timidity which kept them from either front four years ago, but few of them dare now to avow their real opinions.

THE recent action of the Alabama Legislature in relieving disabilities, and restoring the franchise to all citizens late rebels, elicits no gratitude from the rebels of that State. Nor has this action been generally chronicled by the Northern Democratic press. Each of the rebel wings is actuated in this by the same motive—hate for the Republicans who have made this liberal concession.

ALL that the South contended for its "lost cause" is to be regained, said ex-GOV. VANCE, in the election of SEYMOUR and BLAIR. Very naturally, therefore, a score of ex-rebel generals and politicians, lately assembled at the Virginia Springs, are about to present a joint address to the people of the Union which they fought against, as an electioneering document for the Democratic candidates. It should have OULD'S pamphlet on his "miserable wretches" of Union prisoners, for an appendix.

THE loyal authorities of Tennessee indicate their resolute purpose to apply to the rebel element in that State so much of "coercion" as shall secure a complete submission to the laws. We have been partial to that method of dealing with traitors and anarchists since 1861, and cannot but commend the promptitude with which Tennessee proposes to renew the treatment. Her example is worthy of imitation in the Southern States, wherein armed combinations of Democratic rebels exist to obstruct the execution of the laws, and to abridge the just rights, personal and political, of American citizens.

### CAST STEEL FOR BOILERS.

Within a few years the manufacture of steel has become one of the most important in this city, the annual product now reaching nearly five millions, without including the value added to much of it by being wrought into tools, agricultural implements and other useful forms. Besides the rapidly increasing demand for the many purposes for which it has already been used, it is constantly being applied to new uses; and while iron is supplanting other materials of construction, steel is encroaching on the domain of iron. Its greater strength has always afforded hopes of its proving fitter than iron to resist heavy strains; but the supposed difficulty of producing uniformity of quality, long prevented its being trusted by engineers. Latterly this difficulty has been so completely overcome, that our best manufacturers are able to vary the quality of their steel to suit any purpose for which it may be required, so that quite a vocabulary of terms is used to denote the numerous varieties. One of these, ususually called "homogeneous metal," contains much less carbon than other steel, and so occupies a middle position between wrought iron and cast steel, partaking of the qualities of both. This is so even in the process of manufacture. It is melted with much more difficulty than steel, but with less than iron, the fusibility of steel depending upon the amount of carbon it contains. For this reason its production requires more skill than higher grades of cast steel and is attended with greater expense; crucibles which would last for several heats with the one are often destroyed by a single charge of the other. In maleability and ductility homogeneous metal is equal to iron; it welds nearly as well; is tougher both hot and cold; has much greater tensile strength than iron; and is free from the brittleness of highly carbonized steel. These qualities render it so superior to iron that it is now substituted for many purposes for which the higher grades of steel are utterly unfit.

Its use in the construction of boilers should be especially interesting to the public, where it so involves the security of life. For this purpose it might appear at first sight as if great strength were the most necessary quality, and such, indeed, was the belief when it was first used for boilers. Steel boiler plates were then required to have a high tensile strength, and this was obtained in the readiest manner by making them hard; and invariably where this was done, failures resulted, the plates often cracking in punching, riveting or caulking, and thus preventing a worse catastrophe. JOHN BROWN & Co., of the Atlas Works, Sheffield, one of the most noted firms in England, for a time signally failed in this way, so that now their manager, WILLIAM BRAGG, whose world-wide reputation as an engineer, gives great weight to his opinion, states that no steel of more than 75,000 pounds tensile strength should be used for boilers, and in this opinion he is sustained by the London *Engineer* and other high authorities. On the other hand, the British Admiralty retain their original specification requiring a minimum tensile strength of 80,000 pounds in steel used for armor plates and for steel vessels, and make no specific requirement of a certain degree of ductility. The disastrous results of this adherence to exploded notions have been deprecated by English engineers, but, as yet, to no purpose. Steel makers easily fulfil the requirements of the Government specification by furnishing a highly carbonized, and therefore hard and brittle steel, for purposes where the opposite qualities are imperatively necessary. Vessels so made would quickly break to pieces upon rocks, where those made of soft, ductile and flexible plates might be battered out of shape before rupturing the plates or starting a serious leak. So, too, locomotives with boilers made of such plates have plunged over precipices or into each other without explosion, because the material yielded to the violent strains, stretching or bending, but never breaking.

Now for the rationale of all this. To make it obvious to all, let us take the instance of two steel springs, one tempered so hard as to be brittle, the other soft and elastic. The first is more rigid and will support a much heavier weight than the other. In this sense it is stronger. Vary the test by striking a heavy blow on each. The strong, rigid, highly tempered spring snaps off, while the more mild tempered yields to the blow and then, by its elasticity, returns uninjured to its former shape. Again: bend both, and the stiff spring breaks before the other is at all strained. The same difference obtains in boilers, and is aggravated by other causes. Among these are the unequal strains produced by irregularities of riveting. The soft ductile steel yields to these without being unduly strained. The hard resists until it is broken, or the offending rivet is torn away. Unequal expression and contraction also operate destructively upon the more rigid boiler, while that of softer material is not endangered. Many mysterious explosions have been so caused. When cold water is rapidly injected into a highly heated boiler it tends to the bottom, cooling that part while the top is kept hot by the steam. In a boiler thirty feet long a reduction of one hundred degrees of heat at the bottom will cause it to contract nearly one-fourth of an inch in length; but the boiler heads being kept apart by the still expanded portion above, the bottom plates are distended, so as to rupture them if too hard, or to elongate them without danger if sufficiently ductile. Thus in every way the highly carbonized steel is at a disadvantage. Here the battle is not to the strong, unless that strength co-exists with a mild and flexible disposition.

Not that we decry great tensile strength as in itself a fault. In this we agree with the opinion of a high English authority, J. F. SMITH, Esq., C. E., manager of the Barrow Iron and Steel Company's works. He says: "A higher coefficient of rupture than forty tons is unadvisable in the present state of manufacture, as, although that or a far higher coefficient may be procured, it is so at a more than proportionate loss of elongation, *i. e.* toughness in the steel." And he rightly considers a moderate ultimate limit of strength, with a large elongation, as that which should be sought by the engineer employing steel in his structures.

Commenting on this the *Mechanics' Journal* says: "In this we ourselves quite agree, although at the same time urging upon the steel maker that his business is to exalt the breaking standard to the highest point he can, while keeping it combined with a large, at least a sufficiently safe, coefficient of elongation. We saw with some surprise, specimens of bolt steel which had been pulled asunder under a strain of thirty-two tons per square inch, and the ultimate elongation of which was as much as one-sixth the unit, or two inches to the foot, a degree of toughness which we did not previously believe procurable with Bessemer, or, indeed, any other steel of that tensile strength."

Now we have recently seen several pieces of Pittsburgh steel tested, which bore a much higher strain than this, and were elongated three inches to the foot. These were made by PARK, BROTHER & Co., of the Black Diamond Steel Works. Yesterday we noticed the testing of a boiler made of that variety of their steel called "homogeneous metal," which bore more than 720 lbs, pressure per square inch, equivalent to 74,000 lbs, tensile strain, without bursting; while the plates stretched enough to increase the circumference nearly three inches. By this trial the qualities of steel recommended for boilers, by the best engineering authorities were shown to have been combined in that which was subjected to it.

### AN OLD TIME CUSTOM.

The late Judge BALDWIN of the U. S. Court was in the habit of frequently handing to the Marshal the names of some of the early settlers, who, by reason of advanced age, had retired from all active or laborious pursuits, but who were known by the Judge to be respected and revered in their respective neighborhoods. These persons would be summoned as jurors in the District Courts, and thus brought together, the learned Judge and they would find much pleasure in their recountal of incidents of the olden time. This practice, inaugurated by Judge BALDWIN, we are happy to believe is continued by Judge MCCANDLESS, who like his eminent predecessor, is addicted to doing pleasant things, and always in a graceful manner. We ascribe it to this custom that we are frequently called upon during the sessions of the U. S. Court in this city by men from the northern counties whom in our boyhood we were wont to reverence as our venerable seniors. Long may the practice continue.

### THE MAYORALTY.

We understand that calls are in circulation for signatures, requesting Mr. BLACKMORE to become a Citizens' candidate for Mayor. We trust that no Republican will be inveigled into signing such papers. The plea is that we should take the Mayoralty out of politics; but every one knows that Mr. BLACKMORE is a party man—a SEYMOUR man, in fact, and that every vote cast for him will be claimed as a vote for SEYMOUR, just as his election last year, as a Citizens' candidate, was claimed throughout the length and breadth of the land as a Democratic victory.

The rowdies who perambulated the streets last Monday night, attacking our GRANT Club processions, and defiling the air with their coarse howlings, made their throats sore hurrahing for "SEYMOUR, BLACKMORE and BLAIR!" Will any Republican suffer himself to be found in such company, or vote for any one whose name is thus sandwiched between the Presidential candidates of the Copperheads?

CITIZENS, who are inclined to doubt that General ROSECRANS goes to Mexico for the real purpose of promoting a gigantic land-grant speculation, in the interest of certain capitalists and high officers of this government, seem to allow no weight to the mass of circumstantial testimony on this point. If they await the explicit avowal of this scheme, from the parties concerned in it, they will never hear it; no better evidence is likely to be had than what we have already—until it culminates in the armed occupation of Sonora, Sinaloa, Chihuahua, Durango and Lower California, and another war with the protesting Mexicans. And this is what is to be styled "the acceptance of a Protectorate" over that wretched country. In reality, this land-grant speculation is perfectly well understood, notwithstanding the attempts to deny it, which emanate from Washington, and it is equally apparent that it can never be consummated with the acquiescence of the Mexican people. They will resist it with what strength they may. As for the vulgar notions about "manifest destiny," "the absorption of the Continent by the Anglo-Saxon race," and all that sort of thing, we are glad to observe that such discreditable talk is confined to very few of the American journals, and is seen in none which are recognized by the people as safe and prudent exponents of public sentiment. With these inconsiderable exceptions, the press concurs in denouncing this Mexican proposition, as being what it is, and what we have heretofore characterized it—a gigantic job of usurpation and spoliation, to be put through, in private interests, but in the name of the American people, by the prostitution of the National influence and strength, and at the certain cost of a war with our outraged neighbors.

OULD, the rebel Commissioner of Prisoners, who has recently been pamphleteering in behalf of SEYMOUR and BLAIR, is the same infamous traitor who, writing to his superiors at Richmond while an exchange was in progress, used the following language:

*The arrangement I have made works largely in our favor. We get rid of a set of miserable wretches, and receive some of the best material I ever saw.*

THE difference between Grant and Blair is the difference between a "mum" man and a "rum" man.

### ADDRESS TO SOLDIERS AND CITIZENS.

From the second address, prepared by the "Soldiers' and Sailors' Committee" a- Philadelphia, we make the annexed extracts:

WHO PROLONGED THE WAR.

The reverses of our armies before Richmond in the summer of 1862 gave new life to the Peace Democracy who, in November of that year, elected Mr. Seymour Governor of New York. The victory at Antietam did not abate their ardor, followed as it was by the proclamation of the President on the 22d of September, announcing that on 1st of January, 1863, he would proclaim freedom to all the slaves in the rebel States. Of the views of Mr. Seymour and his friends in New York, Lord Lyons, in an official dispatch to Earl Russell, dated Washington, November 17, 1862, wrote as follows:

"On my arrival at New York, on the 8th inst., I found the Conservative (Democratic) leaders exulting in the crowning success achieved by the party in that State. Several of the leaders of the Democratic party sought interviews with me, both before and after the arrival of the intelligence of Gen. McClellan's dismissal. The subject uppermost in their minds, while they were speaking to me, *was naturally* THAT OF FOREIGN MEDIATION BETWEEN THE NORTH AND THE SOUTH. Many of them seemed to think this mediation must come at last, but they appeared to be very much afraid of its coming too soon. It was evident that a premature proposal of foreign intervention would afford the Radical party a means of reviving the violent war spirit, and of thus defeating the peaceful plans of the Conservatives.

"At the bottom I thought I perceived a desire to put an end to the war, even at the risk of losing the Southern States altogether; but it was plain it was not thought prudent to avow this desire. Indeed, some hints of it, dropped before the elections, were so ill received that a strong declaration in the contrary sense was deemed necessary by the Democratic leaders.

"They mantain that the object of the military operations should be to place the North in a position to demand an armistice with honor and effect. The armistice should (they held) be followed by a convention, in which such changes of the Constitution should be proposed as would give the South ample security on the subject of its slave property.

"The more sagacious members of the party must, however, look upon the proposal of a convention merely as a last experiment to test the possibility of re-union. They are no doubt well aware that the more probable consequences of such an armistice would be the establishment of Southern independence.

"It is with reference to such an armistice as they desire to attain that the leaders of the Conservative party regard the question of foreign mediation."

If the Democratic leaders had dared to declare these views, and this trafficking with the representative of Great Britain, they would have been branded as traitors to the Union.

After the issuing of President Lincoln's first emancipation proclamation, Mr. Seymour publicly said, "that if the Union could only be maintained by abolishing slavery, then the Union ought to be given up."

On the 4th of May, 1863, Mr. Vallandigham was arrested by General Burnside for "declaring disloyal sentiments and opinions with the object of weakening the power of the Government in its efforts to suppress an unlawful rebellion. He was tried by a court martial and convicted and sentenced to be placed in close confinement in some fortress of the United States during the continuance of the war, which was changed by the President to sending him beyond our military lines. The national judiciary declined to interfere, and his cause was taken up by a Democratic convention at Albany on the 16th May, by the Ohio Democratic Convention on the 11th of June, by a Democratic meeting in the State House yard at Philadelphia, and by the Democratic Gubernatorial Convention held at Harrisburg in the month of June, at the moment the rebel army was marching into Pennsylvania.

The President's replies to the Albany and Ohio committees were conclusive and are models of Executive correspondence, courteous, dignified, and keeping strictly to the point. How far Mr. Vallandigham's patriotism justified the exertions of his political friends, to return him from banishment and to elect him Governor of Ohio, an anecdote chronicled in "The Rebel War Clerk's Diary" may illustrate: "June 22d, 1863.—To-day I saw the memorandum of Mr. Ould of the conversation held with Mr. Vallandigham for file in the archives. *He (Mr. Vallandigham) says if we can only hold out this year, that the Peace party of the North would sweep the Lincoln dynasty out of existence.* He seemed to have thought that our cause was sinking and *feared we would submit*, which, of course, WOULD BE RUINOUS TO HIS PARTY. But he advises strongly against any invasion of Pennsylvania, for that would unite all parties at the North, and so strengthen Lincoln's hands that he would be able to crush all opposition, and trample upon the constitutional rights of the people." The President (Davis) endorsed on it his disagreement as to the invasion of Pennsylvania. "But," added Mr. Davis, "Mr. Vallandigham is for restoring the Union, amicably, of course; and if it cannot be so done, then possibly he is in favor of recognizing our independence."

This gentleman was the active, real manager of the Chicago Democratic Convention of 1864, and the intimate personal and political friend of its president, Governor Seymour, and the real manager who made Mr. Seymour the nominee of the New York Convention. Pendleton and Thurman are but names, whilst Vallandigham, the master spirit of the Peace Democracy, dictates the nominee and will PRESCRIBE HIS POLICY.

[The address proceeds to quote the well-known language of Governor Seymour, and of Ex-President Pierce in opposition to the war and to the draft, and closes as follows:]

The victory of Gettysburgh and the surrender of Vicksburg on the 4th of July falsified all the predictions of Pierce and Seymour, and demonstrated to these Peace Democrats that the American people were determined to subdue the Democratic rebels in the South by force of arms, and not by a timid attempt to use *moral* force only, which must have inevitably led, as those distinguished gentlemen must have known, to the establishment of a Southern Slave Confederacy.

The Democratic peace plan would have dissolved the Union, whilst the Republican plan saved and preserved it entire, not losing one single inch of our territory, or waiving one single constitutional power to put down treason and rebellion against the lawful Government of the United States.

It seems almost incredible that with such persistent and traitorous opposition, the loyal soldiers and sailors should have succeeded in saving the nation.

By order of the Committee.

—Late advices from Hayti state that Solnave was again defeated, and was acting solely on the defensive. He had forced a loan of $200,000, and two wealthy merchants have been to Europe to negotiate for money. The rebel war ship Liberte was blockading Gonaves. Solnave had purchased another war vessel. The Ministry has been organized, and a reconciliation between Solnave and the British Minister has taken place.

### THE DEMOCRATIC REBELLION.

The successive steps, by which the Democratic programme for another civil war is to be executed, were significantly foreshadowed by Blair when, in his Broadhead letter, he declared that the existing Southern State governments can only be overthrown by the authority of the Executive and the army at his back. How this is to be accomplished is more minutely set forth in the annexed extract, from *Harper's Weekly*, which shows precisely the inevitable results of the election of the Democratic candidates:

"How a Democratic success at the election would occasion civil war is easily seen. General Blair does not hesitate to avow it. Congress must be wholly disregarded. The Supreme Court must not be invoked. The President must usurp all power of the government and act alone. He must be a Cæsar. 'Because,' says General Blair in his letter 'if the President elected by the Democracy enforces, or permits others to enforce, these Reconstruction acts, the radicals, by the accession of twenty spurious senators and fifty representatives, will control both branches of Congress, and his administration will be as powerless as the present one of Mr. Johnson.' Force is, therefore, the only alternative.

"If Mr. Seymour be elected after this loud and reiterated declaration by his party that his election will mean forcible overthrow of the present State governments in the Southern States, the result is evident. He would officially declare these governments void. He would then be impeached and probably convicted; but the Democratic party, victorious at the polls, with the whole rebel force jubilant and ready, would dispute the sentence and rise against its execution. Meanwhile in the Southern States the new Democratic State organizations, summoned by the President, would be formed. They would dispute the State authority with the present incumbents. The President would recogniz the new claimants and order the army to their support, and to 'trample in the dust' the others. They in turn would appeal to Congress, already engaged in conflict with the President. Meanwhile the Representatives and Senators from the new State organizations would arrive in Washington, and in concert with the other Democratic members would be recognized as Congress by the President. But, indeed, long before this event, civil war would be ravaging the country, and Wade Hampton, and Robert Toombs, and Howell Cobb, and the old rebel chiefs who say with Albert Pike, 'We do not love and will not pretend to love that Union, though we have agreed to obey the laws of the conqueror,' would gladly behold in a desolating war and a ruined republic the fullness of their revenge."

—A letter from Florence, Italy, says: "My observation and information only tend to confirm my impression that the party of action is secretly working throughout Italy. In the first place Menotti and Ricciotti Garibaldi are constantly travelling in Italy, and make frequent voyages to Caprera. When visiting Italian towns they are known to have long confidential interviews with leading Garibaldi partizans, and it is not unreasonably concluded that these visits, costing long and expensive journeys, are not taken for the mere pleasure of exchanging friendly salutations. Menotti Garibaldi, according to a Turin Democratic organ, has lately visited England in order to collect funds for a second Garibaldian invasion. His brother, it may be remembered, made a similar visit last year with very good results. Another significant point is, that a movement has been recently set on foot to organize mutual relief or beneficial societies among the Garibaldians."

### IS YOUR DISEASE RHEUMATISM?

Many persons, supposing they are suffering from this disease, have applied Linaments, Plasters and other Rheumatic Remedies without obtaining any relief, when in fact the cause of pain is a derangement of the Kidneys. These are small organs, but very important, and any obstruction or interference with its functions are indicated by pain in the back and loins, languor and weakness, difficulty in avoiding and unnatural color of the urine. A Diuretic should t once be resorted to.

### THE BODY RENEWED.

According to Physiologists, the human body is renewed once in seven years. Every day, every hour, every moment, the flesh, the cartilage, bone and muscle of the frame are wasting away, and being imperceptibly replaced by new material. Health depends upon the nature of that material, and whether it shall be pure or diseased, full of vitality and elasticity, or feeble and flaccid, depends mainly upon the action of the stomach. In warm weather the waste of the system is very rapid, and if it is not as rapidly repaired by the great sustaining organ, the consequence is debility, emaciation and decay. It is, therefore, of paramount importance that the stomach be kept in a vigorous condition at this trying season, and the safest, surest and best tonic that can be employed for that purpose is HOSTETTER'S BITTERS. This incomparable vegetable stomachic gives unwonted energy to the digestive powers, promotes the conversion of the food into healthful blood, (which is, so to speak, the raw material of all the solid portions of the body,) and thereby puts the system in the best possible state of defence against epidemic or other diseases. The strong require it to keep up their strength; the weak, to re-invigorate them. It consists of the purest of all diffusive stimulants, charged with the juices and extracts of the most genial roots and herbs, and is a permanent restorative—not a mere temporary excitant. It acts simultaneously upon the stomach, the bowels and the liver, and is the best known remedy for dyspepsia, biliousness, costiveness and general debility.

### CHRONIC DISEASES OF THE EAR.

In observations and notes taken by Dr. KEYSER, of this city, on the various diseases of the ear, he says that nine out of ten cases could be cured in their incipiency if application were made to some responsible and competent aural surgeon. The Doctor quotes from the opinion of Wilde, a well known aural surgeon, who says: "I fear not to reiterate the assertion which I made on several former occasions, that if the disease of the ear were as well studied or understood by the generality of practitioners, and as early attended to as those of the eye, it would be found that they were just as much within the pale of scientific treatment. * * Deafness is so common and so distressing an infirmity, and when of long standing so incurable, that we cannot too strongly urge all medical practitioners to make themselves familiar with the treatment of the diseases of the ear."

The Doctor says that nearly all annoying Discharges, Buzzings and Morbid Growths peculiar to the organ of the hearing, some of which had lingered through a score or two of years, can be cured or ameliorated by proper treatment.

THE annual loss by attrition, in the silver coins of Great Britain, is stated to be increasing. The worn shillings and sixpences are purchased at the English mint at the value expressed on the face of the coin. To make up the difference between the real and the nominal value of the silver pieces bought at the mint for re-coinage, the Government granted in 1867 the sum of £15,000 sterling, or 300,000 shillings. This amount was estimated as representing the abrasion of the silver coinage of Great Britain during the year 1867. The weight of the silver thus rubbed off by constant handling amounts to 54,750 ounces.

This Company, National in its character, offers by reason of the Large Capital, Low Rates of Premium and New Tables, the most desirable means of insuring life yet presented to the public.

The rates of premium being largely reduced, are made as favorable to the insurers as those of the best Mutual Companies, and avoid all the complications and uncertainties of Notes, Dividends and the misunderstandings which the latter are so apt to cause the Policy-Holders.

Several new and attractive tables are now presented which need only to be understood to prove acceptable to the public, such as INCOME-PRODUCING POLICY and RETURN PREMIUM POLICY. In the former, the policy-holder not only secures a life insurance, payable at death, but will receive, if living, after a period of a few years, *an annual income equal to ten per cent. (10 per cent.) of the par of his policy.* The latter the Company agrees *to return to the assured the total amount of money he has paid in, in addition to the amount of his policy.*

The attention of persons contemplating insuring their lives or increasing the amount of insurance they already have, is called to the special advantages offered by the National Life Insurance Company.

Circulars, Pamphlets and full particulars given on application at the Branch office of the Company in Philadelphia, or its General Agents.

☞LOCAL AGENTS ARE WANTED in every City and Town; and applications from competent parties for such agencies with suitable endorsement, should be addressed To THE COMPANY'S GENERAL AGENTS ONLY, in their respective districts.

# The Pittsburgh Gazette.

## FINANCE AND TRADE.

OFFICE OF THE PITTSBURGH GAZETTE, THURSDAY, August 27, 1868.

The gold market has been subject to rapid fractions, varying from 143¼ to 146¾, but doubtless this means lower rates for gold. The bull clique being forced to buy at high rates, are trying to make their money out of the public, and have so far been very successful. So long as the rate of exchange do not advance to the specie supplying point, it will be impossible to force up the market for want of orders to buy for actual use.

Governments took a sudden jump up; five-twenties of 1867 being quoted as low as 106½, have advanced to 108¼; 1868's are in demand by short sellers, and 1864's are in better demand for shipment; the rise, however, is only a twist for the bears.

Stocks are firmer and higher, the cliques are assisted by the easy money market, they have the market all to themselves; there is but few purchasers of the outside public in the market. Fort Wayne advanced from 106 to 108¼; Cleveland & Pittsburgh, Rock Island, New York Central and the North Western shares are all firmly held. Express shares are improved, and are now on the rise; the rise, however, cannot be permanent so long as the companies do not continue to pay their regular dividends.

Money easy, and business quiet.

The New York Stock quotations to-day as received by Mr. Ph. R. Mertz, were as follows: Gold 144⅞; 1881's, 114; 5-20's, 1862, 113¾; do 1864, 109¼; do 1865, 111⅝; do new, 108¼; do 1867, 107⅞; 10-40's, 108¼; Cleveland & Pittsburgh 86⅜; Fort Wayne, 108½; Western Union Telegraph 33¾; Adams Express, 47¾; Erie, 49½; New York Central, 125⅜; Reading, 91⅝; Michigan Southern, 83¾; Chicago & Rock Island, 100¼; Chicago & North Western, 82¼; do Preferred, 82⅜; Ohio & Mississippi Certificates, 28⅝.

—The New York *Tribune*, in speaking of General Spinner's recent letter in regard to an immediate resumption of specie payments, comments as follows: The excellent letter from Gen. Spinner, Treasurer of the United States, is one of the clearest expositions of the necessity for a speedy return to specie payments, and of the ease with which that measure can be effected, which we have yet read. Gen. Spinner sees no reason why resumption should not take place almost immediately, and he shows how the National Banks can aid in the movement, and why they ought to do so. Resumption—not ten years hence, nor five, but now, at once—is the true way to relieve our national burdens, and to defeat the schemes of the dishonest and the ignorant financiers who are trying to ruin our credit and break down our treasury by partial or complete repudiation. The letter deserves to be generally read, and it is so sensibly written that everybody can understand it.

—The following extract from a communication of Commissioner Rollins to a tobacco inspector in New York, is of importance to cigar manufacturers: If a manufacturer permits his cigar makers to take tobacco to their houses to make into cigars for him, he must also furnish the means to put them up in the manner required by law, at the place where they are made, before being returned to him. They can not be returned to him in bulk.

## PITTSBURGH MARKETS.

OFFICE OF THE PITTSBURGH GAZETTE, THURSDAY, August 27, 1868.

The most important feature we have to notice to-day, is an advance in Wheat in the West. It is thought, however, that it will be of short duration, as there is no good or substantial cause for such a movement; the receipts in nearly all of the Western markets continue large, and the crop of Spring Wheat is said to be unusually large, and of very fine quality. Indeed, we hear it asserted that new No. 1 Spring is almost equal to new Winter, though our mills, here, give the latter the preference, and thus far the receipts of Spring in this market have been very light. We are not of those who believe that Wheat will go down to where it was previous to the war, but we can see no reason for the high prices which have prevailed for the past two years, in consequence of a partial failure of the crop, being sustained. That the crop this year is a good one, considerably above the average of the last two or three years, is evident to any one who will take a glance at the receipts in all of the large markets. The prospect for a big corn crop were never better, and we hear it asserted that the yield this year will doubtless be the largest ever harvested in this country.

BUTTER—Is quiet but steady with regular sales of prime to choice fresh packed at 35 to 37.

EGGS—Scarce and in demand, and fresh packed may be quoted firm at 18c.

CHEESE—Is quiet and unchanged at 15 to 16c for Western Reserve and Hamburg; 16 to 17c for Factory; 18c for Goshen, and 20c for Sweitzer.

HAY—Baled is in good demand and in limited supply; sale of 1 car at $28; and 1 at $29. Wagon Hay may be quoted at $20 to $30 per ton, as to quality.

SEEDS—Sales of Timothy Seed at $3,25c to $3,50 and Flaxseed at $2,25. Cloverseed is quiet and nominal at $7,50 to $8.

GRAIN—Winter Wheat is in steady demand at $2,10 to $2,15 for prime to choice Red, and 5 cents higher for White. Oats a little dull, notwithstanding the receipts are falling off somewhat; sales reported on track at 60 to 62c, and in store at 64 to 65c. Rye is quiet but unchanged at $1,35. Corn is quiet and unchanged at $1,06 to $1,12, for mixed to prime Yellow. All is doubt and confusion in regard to the Barley market, as yet. We hear of offers to sell No. 2 Chicago at $1,80, though this figure would no doubt be paid for prime Ohio and Penna.

GREEN APPLES—In good supply and dull but unchanged at $2 to $3,50 for fair to choice.

POTATOES—In limited supply, and good to prime fresh receipts may be quoted at $3,50 to $4 per bbl.

SALT—Is dull and unchanged at $1,75 to $1,80, to the trade, for Allegheny River brands, and $2 for small lots in store.

LARD OIL—Is firm but unchanged at $1,20 for No. 2, and $1,50 for No. 1.

PROVISIONS—Bacon is steady with regular jobbing sales at 14 to 14¼ for Shoulders; 16½c to 16¾c for Ribbed, and 18½ to 18¾ for Clear Sides; and 22 to 22½ for Sugar Cured Hams. Lard is still quoted at 19½ to 20 for prime kettle rendered. Mess Pork—sales to the trade at $30; may be quoted at $30,50 to $31, in a jobbing way.

MILL FEED—The mill prices are unchanged, as follows: Screenings $1; Bran $1,10; Shipstuffs $1,30; and Middlings, $2,20.

FLOUR—Is quiet and unchanged—the demand is restricted almost entirely to supplying the wants of the local trade. The "Pearl" and "City Mills" continue to quote White Wheat at $11,30 in barrels, and $11 in sacks; and Red Wheat at $10,80 in barrels, and $10,50 in sacks. Rye Flour unchanged at $9,25 for old.

### PITTSBURGH PETROLEUM MARKET.

OFFICE OF THE PITTSBUGH GAZETTE, THURSDAY, August 27, 1868.

CRUDE—The Crude market, continues dull and panicky, and drooping. Spot oil offered at 12, with no buyers, and buyers option all the year, is offering at 12½, with a similar result. We can report 1,000 bbls to be delivered at the option of the seller between now and November 1st, at 12; and 1,000 bbls all the year, sellers option, at 11. It is argued by some that the present downward movement is the result of a large "bear" combination, and that the decline was too rapid and unexpected to be legitimate. Be this as it may, there is no disguising the fact that the market is very sick, and that the "bears" appear to be master of the situation, but how long they will continue to have the supremacy, it is very difficult to conjecture. It was reported that there were offers to sell at Venango City to-day, at $4.25, which if correct, shows a decline of another 25 cts per bbl.

REFINED—The market also continues weak and panicky, and according to to-day's operations, the bottom has not yet been touched. Sales of 500 bbls, buyer's option, until November 1st, at 32c; 500 first half September at 31c; 1,000 do do at 31½c; 500 August at 30½c; 500, seller, ten days, flat, 30¼c, and 5,000, last half September, at 31c. It was reported that one of the most prominent houses, in Philadelphia, had commenced to sell, while, on the other hand, it was also reported that there were heavy orders in that market to buy spot whenever it could be done at the even thirty cents. It was intimated that these rumors may have been put in circulation for effect, as all kinds of stories are put in motion when the market becomes demoralized, as it is at present.

## Letters from a Workingman to Brother Toilers

NUMBER THREE.

*Brothers:* As I showed in my last letter, from its inception in the commencement of the Kansas-Nebraska struggle the "Democratic" party had manipulated entirely in the interests of the slave-masters. Not only that party, but the nation, had been ruled by the slave lords and their Northern "doughface" allies, until the Government had come to be regarded by the South as property owned exclusively by the "chivalry." Occasionally the North had made a balky attempt to assert its rights, but had been frightened by threats or cajoled by "compromise" into surrendering right after right, until it well-nigh earned its low estate. These so-called "compromises" were always frauds, in which the South conceded what it had no right to claim, and the North yielded some of its very life-blood. Nor were they regarded as binding on the South, but if found, under any circumstances, to militate against any so-called "right" of the South, they were immediately set aside, and some new "compromise" hashed up still further to degrade the North.

In asserting that these "compromises" were always "frauds," I wish to be understood as meaning literally what I say. I cannot find one that can claim, or that I would admit to be an exception. I presume that some Republicans, who have been Henry Clay Whigs, will take exception to my assertion, but I am prepared to join issue with any one, and to prove what I say. I never was an admirer of such statesmanship as favored "compromise" when principle was at stake.

One of these "compromises" was the noted "Missouri Compromise," by which the South gained a slave State, and the North gained nothing. On the 17th of February, 1820, the bill admitting Maine as a State into the Union being under consideration, Mr. Thomas, a "dough-face" Senator from Illinois, introduced an amendment, entirely foreign to the bill, with a view to secure the admission of Missouri as a slave State. This amendment was adopted in the Senate, but defeated in the House by the decisive vote of 159 to 18. A Committee of Conference was the result, and this Committee reported a "compromise," which was adopted by Senate and House, the South voting as a unit, and being assisted by fourteen "dough-faces."

This "compromise" drew a line 36 degrees and 30 minutes north latitude, the territory south of which was to be given up to slavery, while it (slavery) was to be forever excluded from all territory north of the said line. The North foolishly imagined that the limits of the devil-begotten institution was permanently "fixed" by this "compromise," but the South simply meant to gain its point, and then regard the *line* just so far as might comport with its will or plans.

In 1852 the territory now comprising the States of Nebraska and Kansas began to seek a territorial organization. By the "Missouri compromise" it was closed to slavery. On the 13th of December, of that year, Mr. Hall, of Missouri, presented a bill organizing the Territory of *Platte*. The House Committee on Territories reported the bill favorably, only changing the name to Nebraska. But when the bill came up in Committee of the Whole, the South showed its *honorable* regard for compacts by attempting to set aside the "Missouri Compromise." Thus was opened the Kansas-Nebraska struggle. I presume it is not necessary for me to enter into a minute examination of the terrible history of that struggle. It is sufficient to say that, although the "Missouri Compromise" had been concocted by the South, and adopted by the South with the help of but fourteen Northern votes, the Kansas-Nebraska struggle was simply an attempt on the part of the South to abrogate that "compromise," and resistance to that attempt on the part of the North. Mr. Stephen A. Douglass, though timid and for a time afraid of offending the South, was driven eventually to a semi-Northern position. He had not the courage to take a firm stand in favor of the maintenance of the Missouri compact, but became the champion of the "Squatter Sovereignty" heresy.

But it is a waste of time and space to linger over the history of this contest. My object is mainly to present the causes and consequences of the disruption and subsequent demise of the Democratic party.

As early as 1856 Mr. Douglas was a prominent aspirant for the Presidency, receiving 121 votes in the "Democratic" Convention of that year to 168 for Mr. Buchanan (on the eighth or ninth ballot). But as the South wanted a candidate it could use as it might please, Mr. Buchanan obtained the nomination. The party was, as usual, bullied and coaxed into the traces, the party rupture healed, and Mr. Buchanan elected President, receiving, however, 377,629 less than a majority of the popular vote.

Passing over the events of 1856 to 1860, we simply remark that after much Border Ruffianism and bloodshed, Kansas became a Free Territory in 1868, and was admitted as a State the very day Jefferson Davis, Clement C. Clay, Mallory and others withdrew from their seats as United States Senators to join in the Rebellion.

Mr. Douglas, during these four years, had won the love and admiration of the masses of his party throughout the Free States, but he had at the same time won the intense hatred of the entire South. Long before the Democratic Convention of 1860 assembled, the signs of a terrible row in the camp were imminent. The South threatened, but Douglas' friends stood firm.

On the 23d of April, 1860, the Democratic Convention met in the city of Charleston, South Carolina. After the organization had been effected by making Caleb Cushing permanent Chairman, the fight began. Two platforms were reported by the Committee—one of which, from the minority, asserted the doctrine of "Popular" or "Squatter Sovereignty." This was adopted by 165 to 138—the ayes including the supporters of Mr. Douglas. Immediately on the announcement of this result, the delegates from Alabama seceded from the Convention, followed by Mississippi, Louisiana, South Carolina, Florida, Texas, Arkansas, &c. Notwithstanding this triumph of Mr. Douglas' "Squatter Sovereignty" theory, he had much difficulty in securing the nomination. After fifty-seven ballots the Convention adjourned to meet in Baltimore on June 18th. On reassembling pursuant to adjournment, a further secession took place. Those remaining "unterrified" held two ballots, resulting in the nomination of Mr. Douglas. The "bolters," or seceders, nominated John C. Breckinridge for President. Thus was the disintegration of the Democratic party perfected.

Before proceeding further with the record of the "Democratic" party, it is necessary to notice the birth and growth of the Republican party. But as this letter is quite long enough, if not too long, I will postpone the subject for my next. L. M.

PITTSBURGH, August 24th, 1868.

LOUIS NAPOLEON'S friends have profited largely, it is asserted, by the success of the Emperor. Haussmann, who was bankrupt previous to 1861, is now worth $20,000,000. Rouher, who in 1848 owned $40,000 worth of real estate, is worth at least $1,000,000. Walewski who was very poor in 1848, owns real estate worth $800,000, and as much more in 4½ per cent. State loans. Persigny, who in 1848 was ejected from several Paris hotels for non payment of board bills, is not only a Duke, but owns four large country seats, two blocks of business houses in Paris, and worth $40,000 worth of the stock of the Credit Foncier. Pietri, a starving adventurer in 1847, has now an income of $60,000.

### The Life of an Iron Bridge.

It sounds a little oddly to hear of the life of an inanimate thing. But it seeme to be pretty well settled, that things inanimate, as well as animate, have life periods, varying according to circumstances. Thus iron itself, when wrought into certain useful things, has a period beyond which it cannot be said to have life sufficient for the purpose for which it was wrought. It is not simply liable to be used up by wear and tear; but also to lose its tenacity and elasticity, and to be disintegrated and weakened—in short, to lose its life and become useless long before it is worn out, and even when not worn at all. For example, a wrought iron girder bridge can bear only a certain amount of daily use, without rapid depreciation of strength. It must have seasons of rest from strain, just as animal requires rest, its life will be proportionately less than it would be under other circumstances. The Engineer has gone into certain calculations to show how long a wrought iron bridge may be expected to live, under given circumstances. And it comes to the conclusions that such a bridge, subject at intervals to a dynamical load not exceeding a fourth part of its powers of ultimate resistance—that is to say, not subjected to this strain more than one hundred times in twenty-four hours—may be safe for travel for about 328 years. But, as many of the hardest worked iron railroad bridges are subjected to twice, or even thrice this number of daily strains, the conclusion reached is, that a girder bridge cannot be safely counted on for more than one hundred years. These calculations, if reliable—and we see not why they may not be—are very important for all users of iron subject to heavy strains. They tend to show that a thing may be as strong as the best iron can make it, and yet be subject to loss of strength and life even without wear.

A GRAND INTERNATIONAL EXHIBITION, it is announced, will be opened at Berlin in the year 1872, and measures have already been taken to organize a body of directors for the enterprise. The buildings will be erected three miles west of Berlin, near Charlottenburg, to which access can easily be gained by means of steamboats on the river Spree, or by a horse passenger railway. Charlottenburg contains manufactories of cotton and hosiery. In Spain an industrial, agricultural, scientific and artistic exhibition is to be opened at Saragossa on October 31st.

JOHN RUSKIN, the famous English writer on architecture, demands that the English Government shall purchase and manage all the railroads of the Kingdom. In a curious letter he argues that private persons should not be permitted to own the railroads of a nation; that all means of public transit should be provided at public expense; that neither railroads nor canals should ever pay dividends to anybody, but should pay their working expenses and no more, and that the whole work of carrying persons or goods should be done as the carriage of letters is now done,

A "COFFEE DRINKER" in Vienna offers a liberal reward to the mechanic who will construct for him a coffee machine that will preserve the full aroma of the coffee. He says that he has purchased all machines now in use, and also those patented last year at the Paris Exposition. None of them, he says, are satisfactory, and *the* coffee machine has yet to be invented.

RECOMMENDATIONS.

The following are a few selected from the multitude of recommendations in our possession:

[From W. P. Heald, Esq., Bangor, Me.]

BANGOR, Me., April 24, 1868.

I hereby certify that I have used tobacco for thirty years past, and for the last fifteen years I have used two pounds per month. I have made attempts to leave off at different times. I have left off one year at a time, but always continued to hanker for it until I used Orton's Preparation, which has completely cured me of the appetite for tobacco. I would recommend all who are affected with this terrible habit to try the preparation, which will certainly cure it if the directions are followed.

W. P. HEALD.

[From E. W. Adkins, Knoxville, Tenn.]

KNOXVILLE, Tenn., August 5, 1867.

This is to certify that I had used tobacco to such an extent that my health had become greatly impaired, and my whole system deranged and broken down. In June, 1867, I purchased one box of Orton's Preparation, and after using it I found that I was completely cured. I have not had any hankering or desire for tobacco since using the preparation. I believe it to be all that it is recommended, and I would advise all who wish to quit the use of tobacco to try one box of Orton's Preparation.

E. W. ADKINS.

[From John Morrill, Bangor, Me.]

BANGOR, Me., March 24, 1868.

This is to certify that I have used tobacco for eighteen years; have tried many times to leave off, but have suffered so much from a dizziness in my head, and gnawing at my stomach, that I have soon given up the trial. A short time since a friend induced me to try Orton's Preparation (sold by you,) I have done so, and am completely cured. I did not in the least hanker after tobacco, either to smoke or chew, after I began to use the Preparation.

For SMOKE AND HOT AIR FLUES, dispensing with the use of Stoves and Fires in or about the Passenger or Baggage Cars, with the attachment to graduate the heat to any temperature that may be desired without the possibility of firing the car or cars to which the Jacket may be attached.

Having obtained of the United States Letters Patent for a Safety Jacket which is warranted to resist the most intense heat that may be applied to it in the position and purpose for which it is intended. It is a sure protection from accidents by fire, originating from defective flues, or where iron pipes are used as conductors for smoke or heat. It is applicable to all piping that may become overheated, and is warranted to give perfect satisfaction where wood or other combustible material may be placed in close proximity thereto. I am now ready to apply my invention to stores, dwellings, factories, ships, steamboats, railroad cars, &c., wherever pipes as conductors are made dangerous by being overheated and security desired. I will sell, on application, rights to manufacture or to use the above invention; also, territorial rights, to such as may wish to engage in selling privileges, either by State or county.

### Our City Schools.

Under the recent organization of the city schools, one hundred and eighty-eight teachers have been employed, classified and salaried as follows: Primary teachers, eighty one, at a salary of $425 per annum; forty-two medium teachers at $500 per annum; thirty-six grammar teachers at $575 per annum; ten Principals, of third grade, at $1,000; one second grade Principal at $1,250; twelve first grade Principals at $1,500, and six teachers in the high school, whose salaries vary from $800 to $1,900 per annum. The salary of primary teachers is $450 for the fourth and fifth years, and $475 for each year of service thereafter.

The schools open on Monday, August 31st, and continue for a term of ten months. The Central Board of Education have authorized the teaching of music in all the public schools, and have also established normal and commercial departments in the Central High School, which will be open for the admission of pupils on Monday next. The normal department is under the immediate control of J. H. Crumb, formally of Bath, New York. He is a graduate of Oberlin College, and one of the first normal teachers in the country.

The Central Board of Education have determined to make this department second to no similar school in the Commonwealth. The consolidated city of Pittsburgh have taken a new start in school matters, and with her present thoroughly organized educational department she stands proudly in advance of her sister cities; but there is one thing more that the people expect the Central Board to do during the present year, viz: to erect a commodious building for the Central High School; this done and they will have fulfilled their duty to their constituents in a highly satisfactory manner.

### Arrangements for the County Fair.

Wednesday afternoon a regular meeting of the Board of Managers of the County Agricultural Society was held. Judge Parke submitted a communication from James Y. McKee, Vice President of the Agricultural College of Pennsylvania, stating that the annual meeting of delegates from the several county societies would be held on Wednesday, September 2d, and asking that three delegates be chosen from this society to attend the meeting.

The communication was accepted, and Messrs. George McKee, Wm. H. Guy, and John Matthews were chosen as delegates, with power to select alternates in case they should be unable to attend. The delegates were instructed to vote for James Kelly, Esq., as a member of the Board of Trustees.

On motion, Captain Young and Judge Park, the Superintendents of the Fair Grounds, were authorized to employ a certain person or persons to place the grounds and buildings in a proper condition for the Fair, which is to be held on Tuesday, Wednesday, Thursday and Friday, October 6th, 7th, 8th and 9th.

On motion, Messrs. Patrick, Negley and Anderson were appointed a committee to regulate the admission of side-shows, etc., to the grounds during the Fair, and adopt rules for their government—all applications for permission to exhibit to be made to the committee.

The Premium List for the Fair is now printed, and copies can be had at No. 10 St. Clair street.

### Taken to Dixmont.

Henry Wilhelm, an insane man, was brought to the city from Greensburg yesterday on his way to Dixmont. The unfortunate victim is said to have brought on his terrible malady by overtaxing his brain with study. The first symptoms were noticed on Saturday last, since when he has been getting worse every day. At times he was quite violent in his paroxisms, and it was found necessary to remove him to a place of security to prevent him from doing injury to himself or others. He was taken to the hospital yesterday afternoon.

### The Colored Row—Hearing Yesterday.

A number of the parties engaged in the row, which was noticed yesterday as having occurred at a colored picnic in Davis' Grove, were arrested and had a hearing before Mayor Drum. It seems that the affair was under the auspices of the Lincoln Greys, a new military organization of colored men, and as no tickets were sold the colored folks favorable to the organization were considered as having a free and cordial invitation to participate. The managers had been at considerable expense to prepare a feast of good things, from which they expected to realize enough to handsomely reimburse them for their trouble and time. The object of the affair seems to have been received with great favor, and accordingly every train leaving the Allegheny station during the day for the grounds was filled with the friends of the "Greys," which made the attendance unusually large.

All went smoothly enough until towards the dinner hour when some of the "mud larks" of the colored fraternity arrived on the grounds, evidently bent on mischief. They had not been present very long before their spirit of maliciousness manifested itself, and caused a considerable disturbance. During this melee the tables were overturned, and amid the crashing of dishes, the destruction of dainty articles of food and refreshment, and the noisy tumult of angry rowdyism, the managers saw with sad consternation the fading away of all their bright anticipations of financial success. Quiet at length was restored, and the festivities proceeded for some time longer. About three o'clock in the afternoon the disturbers were reinforced by a fresh delegation from the city, which was the signal for the renewal of hostilities. This time the combat became more general, and sticks, stones, clods, razors, bayonets and pistols played a prominent part.

During this second melee the colored barber, Samuel Bell, received a severe gash in the abdomen with a razor, wielded by another member of the tonsorial profession named Johnson, who, in return, was wounded and pretty badly bruised by his opponent, who carried a sword. Others of the participants also carried from the grounds sore heads, arms, and bruises in all parts of their bodies, as remembrances of the interesting occasion.

The conflict was brought to a termination by mutual consent, all seeming to be satisfied at what had been done, and most of them being too much exhausted to continue it further. At the hearing last evening they gathered from all portions of the city and congregated around the Mayor's office, a crowd of excited and very talkative individuals, each of whom seemed to have some particular mark of the conflict to exhibit on his person. Most of them, however, according to their own statements, were peaceful but unfortunate spectators of the scene. Several witnesses were examined, after which the case was postponed for a further hearing this afternoon at two o'clock.

### A Female Sharper.

Yesterday morning a lady while out snopping left a bundle containing a quantity of valuable silk lying on the seat of her carriage, which was standing on Fifth street in front of one of the trimming stores, while she went in to make some purchases. During her absence a well-dressed female came out of the store and entered the carriage unobserved by the driver who sat on the box. As she seated herself she spoke to "Jehu," who turned to see what she wanted, when she appeared to be greatly surprised, saying that she had mistaken that for her carriage. She got out and walked away, and shortly afterwards the proprietress of the carriage came out of the store, and upon entering the vehicle discovered that the bundle of silk had been taken and a package containing nothing but paper left in its stead.

### Disorderly House.

Mrs. Rebecca Campbell made information before the Mayor, yesterday, charging Sarah Douglas, Mrs. Wies and others with keeping a disorderly house. It is alleged that a daughter of the pro-ecutrix formerly frequented the house kept by the accused but had recently been induced to become an inmate of the Home for Abandoned Women, on Chatham street. Subsequently she tired of the restraints upon her liberties, and Wednesday evening escaped from the institution by climbing from a third story window. The officers made a descent upon Mrs. Douglas' establishment yesterday and arrested seven women, but the missing girl was not among the number. They were held for a hearing.

### Where Are They?

Mayor Blackmore received a letter yesterday from Henry James of Staffordshire, England, inquiring for William Jackson or his family, and stating that in 1852 a considerable sum of money was left in his hands for Mr. Jackson, who was at that time living at No. 240 Liberty street, and the money has largely accumulated since that time. Mr. James says that one of Jackson's daughters married a physician of this city, but though he has written here repeatedly, his letters have been returned through the dead letter office. It is stated that the Jackson family went West several years since, but to what point is not definitely known.

### Old Sixth Ward Politics.

MESSRS. EDITORS GAZETTE:—Permit me to present through your columns the name of Mr. R. R. Bulger as a candidate for Council in the Seventh ward, (old Sixth,) subject to the Republican primary meeting to be held on Saturday next. He has given consent for the use of his name in this connection, and if nominated and elected will reflect much credit to his constituents and the city at large. He is a shrewd, active business gentleman, the possessor of sound common sense, practical, honest and honorable, and in every way worthy the position. It is of just such men that the City Councils should be composed.

OLD SIXTH WARD.

**Sneak Thief.**—Yesterday about five o'clock a thief entered the residence of Mrs. Ellen Shehan, on the Braddocksfield plank road, near the old city line, and seizing a little girl who was the only one awake, he placed a handkerchief over her mouth and tied her to the floor. He then searched round for a short time and finally decamped with a quantity of groceries and a clock, which was standing on the mantle. The little girl after considerable trouble succeeded in freeing herself and woke the other persons in the house, but by this time the rogue had made good his escape.

**Assault and Battery.**—Margaret Connelly made information before Alderman Thomas yesterday, charging William, Catharine Jane Gallagher with assault and battery. It appears that the parties got into a dispute about the proprietorship of an old coal shovel, which finally resulted in a regular fight, in which the prosecutrix was kicked, beaten and otherwise abused. A warrant was issued for the arrest of the accused.

**New Treatment.**—For chronic diseases of the eye, ear, head, throat, lungs, heart, stomach, liver, &c., at Dr. Aborn's Medical and Surgical Rooms, 134 Smithfield street, half a square from the Postoffice. No charge for consultation. tf

**We have tried** Dr. Harris' cramp cure. It is a safe, speedy remedy for cholera morbus, cramps in the bowels, sickness at stomach, &c., and nobody should fail to have a bottle in his possession.

**A benefactor** to his race is the inventor of Dr. Harris' cramp cure. It is the speediest cure for all disorders of the digestive organs in the world.

**Dr. Keyser.**

We have frequently, within the past few years, published cures performed by Dr. Keyser, of this city, which ought to establish his character for the cure of chronic and stubborn diseases. We notice these more readily from the fact that the Doctor has had a long experience, covering a period of over thirty years, twenty of which have been in this city, in which he has always been regarded as a gentleman of the strictest probity and a high sense of honor. His investigations in the diseases of the lungs and dependent organs have ranked him as a man of uncommon merit, and consumption in its early stages is looked upon as being as much within the province of successful treatment as fever and ague. We suppose every one knows that his office is at 120 Penn street.

**Security Life Insurance Co. of New York.**—George Carleton, formerly a canvasser of this company, is no longer in our employ. The public are cautioned against making payments to him on our account.

**CAUTION!**

**TO BUYERS OF TEA.**

C. A. BOUCHER,

114 SMITHFIELD ST.,

OPPOSITE POST OFFICE.

Original Red Front Tea Warehouse.

The undersigned would respectfully call the attention of buyers of Teas to the inconsistent and false statements made by the

**BOCUS TEA COMPANIES**

Of the present day. Men with scarcely sufficient knowledge of Tea to distinguish Black from Green are advertising themselves as the Great Tea Companies of the country, and claim to sell the best Teas at from 50c. to $1.25 per lb. More apparent falsehood and misrepresentation was never published.

To prove the outrageous nature of such claims it is only necessary to refer to published reports of daily Auction Sales of Teas, by the cargo, in the great market of New York, at which fine Teas cannot be bought for less than from $1.50 to $1.90 per lb.

Another active means of fraud in Tea Stores is in giving SHORT WEIGHT instead of

**16 OUNCES FOR A POUND.**

In this way many buyers are misled into the belief that they are purchasing goods at a reasonable cost, when, in fact, they are, by these means, swindled into paying excessive prices.

The undersigned will give a

REWARD OF $50,

for each and every case of short weight of tea, or other goods, as weighed on his tested scales.

☞A descriptive Catalogue and Price List of Teas to be had on application.
